Art Unit: 1745

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-12, drawn to a method of operating a fuel cell, classified in class
 429, subclass 13.
- II. Claims 13-21, drawn to a fuel cell assembly, classified in class 429, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process. The apparatus as claimed could be used to operate a fuel cell without reversing gas flows.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1745

During a telephone conversation with Robert Fieseler on 22 September 2003 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-12. Affirmation of this election must be made by applicant in replying to this Office action. Claims 13-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "mean life expectancy" as defined by applicants' specification and used in applicants' claims is indefinite because of inconsistencies in the definition.

Art Unit: 1745

Applicants specification states on page 4: "This time period, whether determined for a single cell or for a selected number of cells, for which the mean value (sometimes referred to as the average value) is then obtained under conventional operating conditions is referred to herein as "mean life expectancy". Applicants' definition suggests a "mean life expectancy" can be determined for a single cell, which is contradictory to the established definition of average or mean. A average or mean is obtained from a group of values, and therefore a mean life expectancy of a single cell is contradictory to the definition of "mean".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over McElroy, US Patent 6,589,678.

McElroy discloses a PEM fuel cell stack in which the flow direction of reactant gases are reversed. (Column 3, lines 14-23.) As shown in Figure 2, the fuel cell system disclosed by McElroy includes ports 100 and 110, one of which is an inlet for supply gas, and one which is an outlet. The fuel cell system includes valves 140, 150, and 160 so that source gas (supply conduit) 130 can be connected and disconnected

Art Unit: 1745

from openings or ports 100 and 110. (See Fig. 2 and column 5, line 6-column 5, line 23.) Alternatively, the flow field plates can be rotated. (Column 6, lines 6-16.)

The disclosure of McElroy differs from applicants' invention in that McElroy does not varying gas flow directions when a portion of the mean life expectancy of the fuel cell is reached. However, McElroy teaches that appropriate time periods between flow reversals can be between approximately one week and six months. (Column 5, line 29-34.) Thus, one of ordinary skill in the art would understand the McElroy invention does not include reversing the fluid flow stream every few minutes, but includes flow reversals only after operating the cell for a "substantial portion of the mean life expectancy".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shimizu, JP 06-203861 A discloses a fuel cell system in which gas flows are periodically reversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carol Chaney whose telephone number is (703) 305-3777. The examiner can normally be reached on Mon - Fri 8:00am-4:30pm.

Application/Control Number: 09/998,531 Page 6

Art Unit: 1745

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 703-308-2383. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
